

The Sea of Chipiona, has the best curative sea water in Spain

Doctor Manuel Tolosa Latour (1857-1919), member of the Spanish Royal National Academy of Medicine, selected the area of Corrales de Chipiona, as the best curative sea water in Spain, for its high concentration in Iodo, and marine Placton, creating the San Carlos Hospital, next to the Regla Sanctuary, which was the first Maritime Sanatorium of Spain, founded between 1892 and 1897.

"Sea water heals all the evils of the man FREE" said Euripides more than 2,400 years ago

When you bathe, there is an exchange between substances from the sea and from our body. Swimming a little each day, you will see how you will notice.

*** Many Chipioneros, when you have a wound, or you feel bad, they say to you "Pegate a bath and you will see how the wound is removed, or you get rid of the bad stuff"

*** Many NO Chipioneros usually say, "I go 3 or 4 days to Chipiona, I enjoy the beach, and I bathe frequently, and I return home as NEW"

Seawater is the most complete nutrient in Nature, pyogenic and pathogenic. Thus each Liter of seawater is composed of: H₂O, nucleic acids, DNA, essential amino acids, proteins, fats, vitamins, 118 minerals, phytoplankton, zooplankton-krill / omega3-, fish eggs and larvae, carbon chains, material particulate, 10 billion viruses, 9 billion bacteria, and information on the origins of cell life, all in an alkaline environment of pH 8.4.

There are numerous doctors who prescribe bottled seawater by pharmaceutical laboratories, such as Quinton or Biomaris, and the famous and expensive "thalassotherapy" in luxury hotels, which is based on the use of different marine elements (seawater, algae, mud , etc.) as therapeutic agents.

The Sea of Chipiona, has the best curative sea water in Spain

My Opinion :

When I bathe in a pool, I take a shower quickly, to clean myself of the chlorine and dirt in the water.

When I bathe in the Sea of Chipiona, I try not to shower, to give the sea water time to do its healthy / healing work in my body. Although saltpeter is uncomfortable, and like alcohol, it stings Ja Ja.
